| FOR YOUR INFORMATION |

Here are a few things we'd like you to know about Plexus products:

1. We are NOT A MEAL REPLACEMENT COMPANY! Our products are in capsule form or Plexus Slim, which is a powdered mix you drink once a day and go about your life! We discourage skipping meals or starving yourself!

2. Healthy eating and exercise are encouraged to maximize your benefits with our products!

3. We encourage proper hydration for your body to function properly. Therefore be sure to DRINK WATER! Our body make up is 80% water ... medically, we should consume no less than half our body weight in ounces of water!! Ask yourself ... am I doing that?

4. Our products are natural, but if you have any medical conditions you are concerned about, to be on the safe side, please consult with your doctor before starting them!

Before we begin sharing the products with you, we would like to post our product disclaimer: The product testimonials you will see and read throughout this event, are an individual's experience reflecting the real life experiences of the individuals who used Plexus products. However, individual results may vary. We do not claim, nor should the reader or viewer assume that any individual experiences recounted are typical or representative of what any other consumer might experience.

**POST #2**

SET YOUR EXPECTATIONS .... We want you to know that our goal is to help YOU achieve health and better quality of life with these products. Some of you will drop weight very quickly, while others will feel immediate results and see their body change over time. It’s our recommendation that you look for "inches lost". This is a more accurate measurement of your progress than a scale. Please avoid WEIGHING ON A DAILY BASIS! Weight can fluctuate up and down daily, therefore once a week on the scale will give you a better idea of your progress!

This is precisely why our company offers a 60-day money back guarantee to ALL customers – no questions asked!

POST #3:

Before we introduce our products, we’d like to address a few common questions.

“Is Plexus expensive?” Ask yourself these questions ...

How many of you have a gym membership ... and DON’T go?
How many of you spend money on medications?
How many of you throw out food in the bottom of your refrigerator?

If you could answer any one of these questions, then you CAN afford Plexus!

Your health is WORTH IT.

“Is Plexus safe/FDA approved?”

Safe? Most definitely! Plexus products are safe and the most natural way to improve health which includes losing weight! But we recommend to always check with your physician if you have medical issues or take medications you are not sure about!

FDA approved? How many of you take VITAMINS?? I know I do! Check the label of your vitamin bottle, as it is not FDA approved either. The FDA does not approve or disapprove any vitamins or supplements!!

POST #4:

NOW ... Are you ready to hear about our amazing products? Let’s get started!! Our first products is actually the very first product Plexus brought to market. It was even featured on the CBS television show, The Doctors!  https://www.youtube.com/watch?v=p_qytlnQdw

If your family is like my family, there are several women (and men) close to you who have had a battle with breast cancer. According to BreastCancer.org

• About 1 in 8 U.S. women (about 12%) will develop invasive breast cancer over the course of her lifetime.
• In 2015, an estimated 291,130 new cases of breast cancer are expected to be diagnosed in women in the U.S and about 2,350 new cases in men in 2015.
• About 40,290 women in the U.S. are expected to die in 2015 from breast cancer.
• Currently, there are more than 2.8 million women with a history of breast cancer in the U.S. This includes women currently being treated and women who have finished treatment.

Most doctors feel that early detection tests for breast cancer save thousands of lives each year, and that many more lives could be saved if even more women and their health care providers took advantage of these tests.

Before Plexus Worldwide became an overall health & wellness company we were originally a breast health company and one of our continuing core products is the Breast Chek Kit.

A breast chek kit consists of two micro-thin layers of polyurethane with a non-toxic lubricant sealed in between. When the breast chek is placed on the breast, the bottom layer gently adheres to the skin and remains stable allowing the upper layer to slide freely underneath your fingertips. As the upper layer slides freely over the bottom layer, friction is greatly reduced. This results in what is called ‘sensory touch magnification.’ Or, in other words, your sense of touch is greatly improved, thereby improving the effectiveness of all breast self-exams you do as part of your breast health program. The Plexus Breast Chek Kit may help

Our Breast Chek Kit is the reason Plexus is in existence! It's the very FIRST product Plexus had in their line and EVERY home should have one!

POST #5:

**Plexus Slim ® - Microbiome Activating**

Let’s continue on with our flagship product PLEXUS SLIM [aka the “pink drink”] which is available in two formulas:

Plexus Slim Microbiome Activating is a patent pending health drink your body has been waiting for, with prebiotics to support gut microbiome health, exciting weight loss benefits and a refreshing raspberry, lemon, watermelon flavor.*

Real health begins in your gut. The delicate balance of good and bad microbes in your gut (your “microbiome”) can affect everything from your mood, to your immune system, to your weight. 70% of your immune system cells are linked to your gut and 90% mood boosting serotonin is produced in your gut, where essential vitamins like B12, folate, and good microbes like Akkermansia—can thrive.

Unfortunately, your gut microbiome’s balance can be impaired by any number of factors—poor diet, high stress levels, artificial sweeteners, antibiotics, soda, processed foods, lack of exercise, or poor sleep habits (just to name a few). This imbalance, referred to as dysbiosis, can cause problems that affect your daily life, like bloating, constipation, bad breath, and excess gas. No one wants to deal with that!

The chromium and chlorogenic acid found in the green coffee bean in Slim, work together to help support healthy glucose metabolism. Slim helps you lose weight, and the results are clinically demonstrated in a placebo-controlled study of 175 participants.*

Slim’s new formula is microbiome activating and is designed to help your gut thrive. Slim has been tested in an independent, highly advanced and scientifically validated in vitro study created to mimic the gastrointestinal system. This study demonstrated Slim’s ability to help beneficial microbes flourish in the gut, improving your overall health.

POST #7:

As a result of the modern lifestyle, most of our bodies are burdened with toxic waste and sluggish metabolisms. Having an excess of toxic waste can leave the body tired, achy, and bloated, with a low energy level and weakened immune system. Detoxification is a process that expels excess waste and accumulated toxins from our body. Fortunately, Plexus has developed products to help the body detoxify and cleanse the gastro-intestinal tract and arteries. Which can, in turn, affect HOW our body responds to attempts to lose weight, shed excess fat, or even get healthier!

Tell me ... who out there can relate to THESE symptoms??!!

We realize no TWO bodies are alike! We ALL lose weight, shed fat, and get healthy at different rates because of different issues that may be occurring inside our bodies!

POST #8:

Despite our efforts to make healthy lifestyle choices, it is impossible to avoid the environment around us. Processed foods and the chemicals we are exposed to disrupt the delicate balance of microorganisms in our bodies. Almost 70% of our immune system cells are located in the gut, and optimal health starts with a healthy digestive system. Probiotics are essential to supporting a healthy digestive and immune system, and ProBio5™ is one of the best things you can do to maintain a healthy balance of microflora to help promote optimal health.

Features & Benefits:

- Promotes digestive health. *
- Promotes a healthy immune system. *
- Provides 5 strains of probiotic bacteria to help support and maintain intestinal flora. *

POST #15:
Balance is the most modern, technologically-advanced formula for blood sugar support and carb control that Plexus has ever created.

Balance works in three distinct ways to help provide blood sugar support and carb control:

1. Balance minimizes unwanted blood sugar spikes by slowing the speed at which carbs and sugars are digested, so you get a steady release of energy into the bloodstream;
2. It reduces the absorption of carbs, leaving them undigested so they can be gradually broken down by gut bacteria, without releasing a flood of glucose into the body; and
3. It helps the body more efficiently manage glucose levels, minimizing glucose peaks and valleys so you can avoid that dreaded post-meal crash.

Balance contains natural, clinically-studied ingredients like white kidney bean extract, common bean extract, cinnamon bark extract, and mulberry leaf extract. Together, these ingredients create a technologically-advanced formula for daily blood glucose support and carb control. This along with diet and exercise, can help you focus on maintaining healthy blood sugar levels and helps support a healthy weight management.

Features and Benefits:
- Helps maintain blood sugar already in the normal range*
- Delays digestion and inhibits the absorption of carbs and sugars*
- Supports weight management**
- Reduces the glycemic index of carbs and sugars*
- Helps neutralize enzymes that turn carbs and sugars into glucose*
- Helps reduce calorie intake*
- Features*
- Gluten free
- 100% Vegetarian
- Non-GMO

POST #16:
Plexus BLOCK contains natural ingredients, clinically-tested to work immediately to block the absorption of up to 48% of carbs and sugars from your meal — without blocking the absorption of any beneficial nutrients. *

When you eat, the body does what it’s naturally wired to do — converts carbs and sugar into glucose. But when too much glucose is converted at once, the excess can be stored as fat. Excess glucose means excess fat and excess fat can lead to excess weight.

Take control of what you eat, with BLOCK.

Features and Benefits:
- Maximum strength to help promote healthy body weight. *
- Helps control carbs and sugars*
- Reduces the glycemic index of carbohydrates and sugars*
- Helps manage your weight when combined with healthy diet & exercise*
- Helps maintain blood sugar levels already in the normal range*
- Doesn’t block absorption of any beneficial nutrients*
- Works 3 Ways to Maintain Normal Blood Sugar*
  - Neutralizes enzymes that convert carbohydrates into glucose*

Are you thinking YOU are not a SALESPERSON??
- Have you ever had a terrific meal at a restaurant, and told a friend or family member about it?
- Did you ever recommend your hair stylist to someone, because she is amazing?
- Love the school your children go to? How many people have you told THAT to?

These are just examples of how we already recommend things we love on a regular basis! And with Plexus, you simply take the products, and share what you love about them with everyone you know!

Or maybe you think you won’t have the time for a “business”? We get it!! Just ask yourself ...
- Do you have 30 seconds a day to take your products?
- Do you spend any time on social media or talking with your friends and family? Why not use that time to make a few dollars?
- And once again, how often do you find yourself recommending your favorite restaurant, hair salon or doctor, to someone you know?

Attention my busy Ambassadors... and I know you are out there! Please share how YOU have been able to work YOUR Plexus business around YOUR crazy schedules!!
